Profile

Product Designer with 5+ years of experience designing digital products in regulated industries: fintech, healthcare, and legal tech. Led the design of Banco W's first digital product, which cut the time to open a term deposit (CDT) from two weeks to five minutes, and redesigned an internal legal-sector platform that reduced errors by 40% and saved USD 5,000 per month in rework and delays.

I translate complex business requirements and user insights into clear flows, scalable interfaces, and development-ready design systems. I work closely with product, engineering, and business teams to balance user needs, technical feasibility, and business goals, backing every decision with research and metrics. I integrate AI throughout my process, from prototyping and data analysis to QA and my own pull requests.

Skills

- **AI-powered design:** functional AI prototyping, image and asset generation, data analysis, AI-assisted QA, and pull requests.
- **Product & UX:** discovery, requirements definition, information architecture, user flows, prototyping, UX writing, and research (interviews, focus groups, usability testing).
- **UI & systems:** high-fidelity UI, responsive web and mobile design, design systems, componentization, accessibility, UI/UX QA, and developer handoff.
- **Tools:** Figma, Maze, Google Analytics, Adobe Creative Suite, Mailchimp.

Experience

Product Designer - Katapult - WHEN

October 2025 — Present • Independent contractor

- Lead end-to-end UX/UI processes: experience evaluation, usability improvements, developer handoff, and implementation alignment. Advocate for users in cross-functional teams, prioritizing across user needs, technical feasibility, and business goals.
- Integrate AI tools across the design cycle: functional prototypes, flows, testing, data analysis, and visual asset creation, speeding up idea validation with the team.
- Open my own pull requests to implement UI fixes directly in the codebase, speeding up corrections and reducing back-and-forth with developers.
- Translate business and product requirements into UX flows, high-fidelity UI, and component-based interfaces in collaboration with developers and the Graphic Designer.
- Own the Design System: create, update, and componentize reusable UI elements to ensure consistency and speed up development.
- Run AI-assisted UI/UX QA on implemented features, flagging usability, visual, and functional issues with actionable feedback for the development team.

UX/UI Designer - Iridian

October 2024 — January 2026 • Independent contractor

- Led design for 6+ digital projects across healthcare, tech, and wellness, tailoring each solution to user needs and business goals.
- Designed the informational website for HEP's internal AI system, reducing agent training time by 30% and improving call-handling efficiency by 22%.
- Redesigned the MyCoach app, increasing active user retention by 12%.
- Designed brand-aligned websites for Heel with clearer navigation and stronger visual consistency.
- Managed end-to-end design (research, user flows, wireframes, prototypes, visual design, and stakeholder validation) in agile sprints, aligned with development.

UX/UI Designer - Rob Levine Legal Solutions

December 2024 — December 2025 • Independent contractor

- Led the redesign of Nova, the internal platform used to manage medical record requests from law firms.
- Consolidated a process that forced users to jump across 7 tabs into a single view, and designed a dashboard that didn't exist before.

- Reduced request errors by 40% and time spent finding case information by 20%, saving USD 5,000 per month in rework and delays.
- Ran focus groups, a system audit, stakeholder interviews, and usability tests to identify friction points and errors.
- Designed the information architecture, wireframes, interactive prototypes, and UI system, aligned with backend logic.

UX/UI Designer - Keralty

March 2025 — June 2025 • Fixed-term contract

- Redesigned the payment portal for Keralty Dental Clinics: a flow that sent users back to the start became a guided flow that 91% of patients completed without help (up from 58%).
- Cut the time to pay for a treatment by 45%, letting patients find their treatments with just 2 data points.
- Validated solutions with 24 patients across 3 Maze tests (payment, treatments, and versions), backed by heuristic evaluation and benchmarking.
- Redesigned the home page and services section to improve visual consistency, navigation, and brand alignment.
- Partnered with development, product, and business teams to turn real needs into functional, coherent solutions.

UX/UI Designer - Banco W

June 2023 — May 2024

- Led the design of two digital products from the ground up, including Digital CDT, the bank's first fully digital product, with a 3-person engineering and data team.
- Cut the time to open a term deposit (CDT) from two weeks and at least two branch visits to five minutes on a phone.
- Increased customer satisfaction (CSAT) by 30% versus the in-branch process and CDT openings by 20% in the first 6 months.
- Reduced a 4-page form to 9 fields by reviewing every data point with compliance and risk teams.
- Ran interviews, journey mapping, prototyping, and usability tests in real environments, and supported developer handoff.

UX/UI Designer - Destiny co

January 2022 — May 2023

- Designed responsive web and mobile interfaces for clients including Toyota and Colombina, aligned with brand guidelines, business goals, and user needs.
- Improved content comprehension and navigation on Colombina's platform through a strategic redesign.
- Conducted user research and competitive analysis to define flows, wireframes, and interactive prototypes focused on accessibility and consistency.
- Managed direct clients, presented proposals, and championed user-centered decisions.

Earlier experience

- **Graphic Designer • Rappi Mexico** (September 2020 — December 2022). Designed digital and print assets for multiple sales lines and partners: in-app content, push notifications, banners, emails, social media, and paid media. Helped build standardized workflows to speed up production of serial assets.
- **UX Designer • Banco W** (June 2021 — August 2021). Researched and mapped the bank's services through direct customer contact; identified pain points by product type and proposed improvements for customers, employees, and internal teams.

Education

- **Bachelor's Degree in Industrial Design** • Icesi University, 2016 — 2021
- **Certificate Program in Principles of Usability and Cognitive Psychology** • Icesi University, 2022
- **UX/UI Design Bootcamp** • U camp, 2022

Additional training: Advanced UX/UI Design: Mastering Interaction Design (Udemy, 2024) • Google Analytics: Introduction to Digital Data Analysis (Domestika, 2024) • Introduction to UX Writing (Domestika, 2024) • UI/UX Interface Design Fundamentals (Platzi, 2022)

Languages

Spanish (native) • English (B2) • French (A1)
